

TO KEEP IT BEAUTIFUL,
KEEP IT COVERED.

Covers & all

Corporate overview

Our parent company Bayport International has been involved in wholesale cover manufacturing and custom fitted upholstery stitching for over a decade. Working with companies across the world, we learned a few important things. Firstly, covers business was mainly driven by low quality at low costs. Secondly, it was one size that fits all approach. Further, for outdoor protection purpose, most covers were still serving only half the purpose as most covers were leaking water from the stitches and were not 100% UV resistant. We saw this as an opportunity and decided to take up the challenge to address the above issues. We believe covers being always visible, should be equally

appealing as the article they are covering, while they serve the purpose of maintenance and protection. In last few years there has been huge progress in technical fabrics, stitching, cutting and printing technology and we were successful in combining all of these to produce custom fit covers with personalization and water proof stitching option at a competitive price.

After an enthusiastic response from our corporate, hospitality, and manufacturing customers, we decided to make our products accessible to small businesses, homeowners, and other end-users. In 2015, we launched our products on Amazon and other market places, and again the response was overwhelming.

In 2016, Coversandall.com was born. Today, as we still grow, we are proud to have more than 5000 subscribers, 7000 orders successfully filled and 4.7 rating from our happy customers.

We continue to invest in technology and human resources to find new ways to produce better products at great price.

We are continuously expanding our product portfolio and customer service experience for an absolute delightful customer experience.

Mission

Provide highest quality custom sized-personalized covers using finest materials, for outdoor lifestyle and industrial products.

Philosophy

We have carefully created corporate values which enhance our service to our clients and helps us to fulfill our promise to provide the best in class covers which helps our customers cover virtually everything with style. These values serve as the philosophy that guides our conduct, relationships and the type of products we offer to our customers.

Our core values are:

- Absolute customer satisfaction
- Uncompromising adherence to quality
- Invest and integrate less privileged human resources
- Integrity and professionalism
- Constant improvement mindset

Hot tub cover

The Bayport difference

Bayport covers are in a class of its own, our unique selling propositions are:

- All covers are custom made as per the specifications
- Covers with air vents for breathability & multiple tie downs for secured fits.
- 100% UV resistant and waterproof fabric
- Water proof stitching using European seam tape technology
- Personalization using latest UV printing technology
- Best price / value guarantee
- Custom solution for any covering need

Current infrastructure

Currently using state of the art web to ship technology to achieve high productivity at lower cost. Engineering drawings are generated for each order for high accuracy and after review, orders are sent to production. We use European technology for seaming the stitching with waterproof tapes generally used only in heavy industrial applications. To ensure customization print are accurate and long lasting, we use latest UV LED technology to directly print on the material instead of generally used screen printing. Final stitching is done by one of our 50 plus skilled staff using precision machines. We offer wide range of fabrics and color selection with multiple tie down options to keep covers secure.
