

## Vinyl Strip Door Curtain Kit

- Kindly measure the width within the inner edges of your wall/door/windows.
- Kindly measure the height from the ground till the top corner of the space/door.
- Please note that the height of the door is customizable.
- The final width of the curtain will be approximately 2 inches extra than the door's width to accommodate the hardware easily. The hardware is made of iron metal with powder coating in ivory color.
- The final height of the product (curtain + hardware) will be approximately 3 inches extra than the door's height to accommodate wall mounting installation. Please note that only wall mounting is available.
- We'll provide 25% overlap of the strips in the curtain.
- The curtain strips will be pre fitted on the front and back Bracket. The customer only needs to hang it on the main channel.
- Each strip's width will be fixed at 8 inch (+/- 5 mm). The thickness will be 2.5 mm for each curtain strip.
- The curtain's strip visibility will be 80% and can turn yellowish if used outdoors for 4-6 months.
